Justine Gichana

Full stack web developer & Climate Scientist

I am a self-taught full-stack web developer with a Bachelor's degree in Meteorology from the University of Nairobi. Through my degree program, I gained a deep understanding of atmospheric science, climate, and weather forecasting. This knowledge has allowed me to approach problem-solving with a holistic and analytical mindset, which I apply to my work as a web developer. I am proficient in React and Node.js and experienced in Ubuntu web server management and Photoshop. As a collaborative team player, I value effective communication and teamwork, working closely with clients to achieve their goals. Overall, my diverse skill set and passion for web development make me a valuable asset to any team. Am also looking for a work environment that values creativity, collaboration, and continuous learning, where I can apply my skills and contribute to a dynamic team.
